Karachi, Pakistan

OBJECTIVE

I'm a dedicated full-stack developer with over a year of experience specializing in the MERN stack. Passionate about building efficient, scalable, and user-friendly web applications, I constantly seek to learn, innovate, and improve. I'm also a Level 2 Seller on Fiverr, delivering quality web development services to clients worldwide.

EXPERIENCE

- **Sapphire Consulting Services** *April 2025 - Present*
Full-Stack Developer Karachi, Pakistan
  ◦ Working and developing full-stack web applications using MERN.

- **Fiverr (Freelance)** *Jan 2025 - Present*
Full-Stack Developer | Level 2 Seller
  ◦ Providing professional full-stack web development services using the MERN stack.
  ◦ Collaborating with international clients to deliver responsive and high-quality web applications.

- **ANB Tech Solution (Internship)** *Dec 2024 - Jan 2025*
Full-Stack Developer Remote
  ◦ Worked on full-stack web development, designing user-friendly interfaces, developing and integrating APIs, and optimizing databases for efficient data management.

- **National Freelance Training Program** *Jan 2022 - April 2022*
Creative Design Intern Jamshoro, Pakistan
  ◦ Collaborated on various design projects, creating visually appealing graphics for digital platforms. Focused on brand consistency, delivering designs that enhanced user engagement and supported marketing initiatives.

EDUCATION

- **Mehran University of Engineering & Technology** *November 2020 - November 2024*
Bachelor's in Software Engineering Jamshoro, Pakistan

- **Roshan Tara Model Higher Secondary School** *March 2012 - May 2020*
Intermediate in Pre-Engineering and Secondary Education Ghotki, Pakistan

PROJECTS

- **Estia Hospitality Multi-Vendor Property Calendar System**

  ◦ A cloud-based multi-vendor property calendar, enabling centralized booking management, role-based access, and synchronization with Rentals United for real-time availability across platforms

- **Review Analytics Platform**

  ◦ The Review Analytics Platform is a web-based system designed to process and analyze customer reviews for fast delivery agents. The platform provides automated and manual tagging of reviews, a React-based dashboard for analytics visualization, and role-based access control (RBAC) to manage user permissions.

- **Squid Game: Red Light, Green Light**

  ◦ Squid Game is a web-based game that uses modern web technologies to create an interactive and visually appealing experience. The game involves players trying to reach the finish line without being detected during the 'Red Light' phases.

- **Object Detection-TensorFlow.js**

  ◦ An object detection app using React.js and TensorFlow.js, enabling image identification with object names and confidence levels.

- **Real-Time Video Chat App Using WebRTC**

  ○ Real-time video chat application leveraging WebRTC and Socket.io for seamless peer-to-peer communication. Features include room-based user connections, live audio-video streaming, and dynamic stream negotiation. Developed a peer-to-peer video chat system using WebRTC for real-time audio and video streaming. Implemented Socket.io for room-based user connections and created dynamic stream negotiation for seamless communication.

- **Real-Time Chat App**

  ○ Real-time messaging platform that leverages Socket.io for instant bi-directional communication, enabling seamless chat functionality with features like user authentication, live updates, and chat rooms. Developed a real-time chat application using Socket.io for seamless communication. Implemented user authentication, live updates, and chat room functionality to ensure real-time message delivery and synchronization.

- **ShopVille**

  ○ eCommerce website offering a seamless shopping experience with features like product browsing, cart management, and user authentication. Developed an eCommerce platform with product browsing, cart management, and user authentication features. Implemented secure user authentication and seamless product browsing, integrating a cart management system for a smooth shopping experience.

- **Saucy Spicy**

  ○ Saucy Spicy is a vibrant and user-friendly food ordering app designed to make discovering and enjoying meals effortless. With intuitive navigation, menu updates, and detailed meal descriptions, it ensures a smooth and engaging ordering experience. The app brings your favorite flavors right to your fingertips, making every meal an easy and enjoyable choice.
