 [salamjillani](#) |  [salamjillani](#)

Karachi, Pakistan

OBJECTIVE

I'm a dedicated Full-Stack Developer with over a year of experience specializing in the MERN stack. Passionate about building efficient, scalable, and user-friendly web applications, I also work as a Level 2 Seller on Fiverr, providing high-quality web development solutions to clients worldwide.

EXPERIENCE

- **Sapphire Consulting Services** April 2025 - Present
Associate Consultant
◦ Working and developing full-stack web applications. Karachi, Pakistan
- **Fiverr (Freelance)** Jan 2025 - Present
Full-Stack Developer | Level 2 Seller
◦ Providing professional full-stack web development services.
◦ Collaborating with international clients to deliver responsive and high-quality web applications.
- **ANB Tech Solution (Internship)** Dec 2024 - Jan 2025
Full-Stack Developer Remote
◦ Worked on full-stack web development, designing user-friendly interfaces, developing and integrating APIs, and optimizing databases for efficient data management.

EDUCATION

- **Mehran University of Engineering & Technology** November 2020 - November 2024
Bachelor's in Software Engineering Jamshoro, Pakistan

PROJECTS

- **Transport & Mass Transit Department - Government State Project (GoS) | tmttd.gos.pk**
◦ Worked on the development and maintenance of TMTD Sindh Portal, a government transport management system for vehicle fitness certification, permit management, renewals, verification services, and Excise API integrations. Contributed to backend development, API integration, debugging, and issue resolution.
- **PAIDAR - UNIDO & Government State Project (GoS) | mel.paidar-sindh.org**
◦ A GIS-enabled integrated settlement planning and development initiative focused on improving living standards in underserved rural communities through targeted WASH, education, health, and livelihood interventions.
- **ThisBanana | thisbanana.com**
◦ An AI-driven brand intelligence SaaS that scans websites for visibility and sentiment analysis, generates blog content via OpenAI, and tracks competitor insights. Built with React, Node.js/Express, Supabase, and Stripe, with tiered subscription access and an admin dashboard.
- **CallitDNS | callitdns.com**
◦ A DNS management and health-check platform with AI-powered recommendations and a natural-language assistant ("Dotty") for executing DNS commands. Built with React, Firebase (Auth, Firestore, Cloud Functions), Cloudflare API, and Google Gemini AI, with Stripe subscription billing.
- **Listenn | listenn.com**
◦ A music playlist placement marketplace where artists submit songs through paid campaigns and curators earn by reviewing them. Built with React, Node.js/Express, MongoDB, and Stripe, featuring JWT auth, a referral bonus system, and automated email notifications via cron jobs.
- **Review Analytics Platform**
◦ A web-based system designed to process and analyze customer reviews for fast delivery agents. Features automated and manual review tagging, a React-based analytics dashboard, and role-based access control (RBAC) for user permissions management.

- **Real-Time Chat App**

- Real-time messaging platform leveraging Socket.io for instant bi-directional communication, with user authentication, live updates, and chat room functionality for real-time message delivery and synchronization.

- **ShopVille**

- An eCommerce platform with product browsing, cart management, and secure user authentication, delivering a seamless online shopping experience.

TECHNICAL SKILLS

- **React.js**
- **Next.js**
- **JavaScript/ES6**
- **MongoDB**
- **PostgreSQL**
- **Node.js**
- **Express.js**
- **Firebase**
- **HTML**
- **CSS**
- **TailwindCSS**
- **RESTful APIs**

SOFT SKILLS

- **Problem-Solving**
- **Team Leadership**
- **Collaboration**
- **Effective Communication**
